bat or no .exe. I don't remember any of the games I installed from the disc. I would try to start them, and it says something along the lines of not responding. I then uninstalled everything, reinstalled Windows, and reinstalled all my games. If I start them from the CD now, they work fine. Edit: I wanted to make clear that I don't need the program to keep track of my games. I just need it to find the games I installed. When I install, I usually have an idea of what I'm installing, so I know what I need to look up in the package manager. For example, World of Warcraft. I know I have it installed, so I need to find it in the registry and install it. I would like to find the others like that. A: You could try using a simple search program like Google. Enter your favorite game name into the search bar at Google.com and it will list it for you. Q: Проблема с запуском скрипта в браузере IE Проблема с запуском скрипта в браузере в другой странице пользователя. Мне необходимо на каждый приватный запрос получить ответ о том, какая доменная зона. Подскажите, как правильно обработать этот поворот пользователя в браузере IE в ♦ 82157476af
