Wai), the first fight of his career. For his act, he was forced to retire and never got his title shot despite his perfect record. He's fallen into depression, but gets a chance to get his revenge when a new prison guard called the 'Iceman' gets him a fight with Chambers. Cast Scott Adkins as Yuri Boyka Tom McCarey as Pete Williams Camilla Belle as Lara Christine Michelle as Amy Wills Anna Brecon as Mrs. Wills Michael Jai Wai as George 'Iceman' Chambers External links Category:2005 films Category:2000s action films Category:American films Category:Films about prison escapes Category:English-language films Category:American prison films Excess body weight and insulin resistance in women are associated with decreased expression of AMPK subunit alpha 1, but not beta 1, in adipose tissue. Adipose tissue (AT) secretes a large number of adipokines, the bioactivity of which may be determined in part by the expression of proteins that control the secretion. The present study was undertaken to determine whether obesity and insulin resistance are associated with changes in the mRNA expression of

adenosine monophosphate-activated protein kinase (AMPK) subunit isoforms in human AT. Forty-four obese and 18 lean women were studied in a cross-sectional design with percutaneous AT biopsy. The mRNA expression of alpha 1 (AMPKalpha 1), beta 1 (AMPKbeta 1), and gamma (AMPKgamma) was measured by quantitative RT-PCR. The expression of AMPKalpha 1 and beta 1 was higher in obese than in lean women ($P = 0.0001$ and $P = 0.0004$, respectively). After adjustment for age, ethnicity, body mass index, and glucose tolerance, only alpha 1 expression remained positively associated with obesity ($r = 0.46$, $P = 0.002$). In contrast, the expression of AMPKgamma was not associated with obesity. A positive association was observed between AMPKalpha 1 expression and insulin resistance ($r = 0.37$, $P = 0.007$). These data indicate that the obesity-associated decrease in AMPKalpha 1 expression in AT is unlikely to be a consequence of increased insulin resistance. In addition, increased expression of AMPKbeta 1 in AT of women with obesity is consistent with a role for this isoform in modulating the secretion 82157476af
